

Mosolut Hestra

Our more than 35 years of experience and expertise allow us to offer you a product that meets your high demands for „Made in Sweden“ quality. Choosing Mosolut Hestra tiles gives you a product that will impress you not only with its huge versatility and unique pattern, but above all the durability of the material and its simple and solid locking system. The tiles are made of environmentally friendly polypropylene, which limits all maintenance to occasional cleaning with a vacuum cleaner or wipe-down with a simple cleaning agent. Do not let walls restrict your imagination – you can use these tiles indoors and outdoors, in both dry and wet environments.

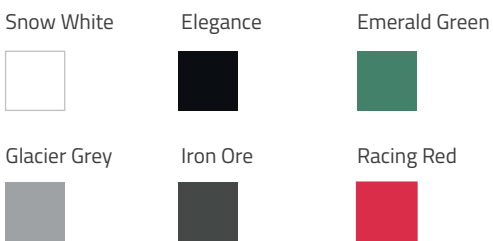

Mosolut Hestra

The unique pattern of these designer tiles from the Hestra series was developed in the 1980s and still defines our basic collection. Temperature deviations from -30 to +70 degrees Celsius guarantee that the tiles are durable, without any deformation, even in larger installations. The tiles in this product line are suitable for countless applications because they are resistant to UV radiation while being at the same time non-flammable. We offer corner and edge molding for a smooth transition into the room.

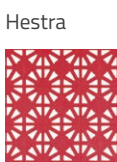

BASIC TECHNICAL PARAMETERS					
12 mm	300 x 300 mm	Efl	0,248 kg / pc	1m ² = 11 pcs	Polypropylen

Mosolut Hestra Universa

The choice of tiles from the Universa product line is suitable for all situations where there is constant and intensive use of the flooring. A robust and durable design allows these floors to be used in the temperature range from -30 to +70 degrees Celsius without deformation, even in larger installations. The locking system means you can perform a complete floor installation quickly and easily on almost any original flat and hard surface. We offer corner and edge molding for a smooth transition into the room.

Mosolut Hestra WoodLook

Mosolut Hestra interlocking tiles in the WoodLook collection does not try to replace wooden floors. It rather represents an alternative without wear and demanding care, and this low need for maintenance, together with easy installation and a comfortable, soft design, makes it an attractive alternative. Let your imagination flow freely and create your own favorite pattern. The tiles can be installed indoors or outdoors in the temperature range of -30 to +70 degrees Celsius and are fully resistant to UV radiation.

Mosolut Hestra Deck45

The Mosolut Hestra Deck45 is our newest tile. Its appearance perfectly imitates traditional wooden solutions, but leaves no splinters on the soles of the feet. The tiles give the balcony, terrace or pergola a pleasant warm look that is typical of wooden terrace boards. Try this maintenance-free, mechanically highly durable and health-friendly surface that lasts for decades.

Did you know?

The tiles' name is a reflection of the 45-degree angle of its pattern, which lets you lay out the tiles in different combinations.
